PRESS RELEASE

Navopache Electric Cooperative and TransWorld Network now offer High-Speed Internet and Digital Phone Service to Eagar, Springerville & Alpine

Pinetop-Lakeside, AZ/Oldsmar, FL, FOR IMMEDIATE RELEASE: Navopache Electric Cooperative (NEC), in partnership with TransWorld Network, Corp. (TWN) now offers Wi-Power High-Speed Internet and Digital Phone service to residents and businesses in Eagar, Springerville and Alpine, Arizona.

Wi-Power High-Speed Internet is a fixed, wireless, line of sight Internet technology that gives customers download speeds of up to 5 Mbps with even higher speeds available for businesses. Unlike other types of Internet technology like satellite or DSL, Wi-power is not subject to certain issues like rain fade, proximity to populated areas or interrupted download speeds due to latency. Wi-Power Digital Phone service uses a high-speed Internet connection to make and receive local and long distance telephone calls. This technology eliminates the need for a landline phone and offers the same great features as traditional phone service such as call waiting, call forwarding, voice mail and 911 services. Bundled Internet and phone packages start at around \$60 per month.

"Proven technology and ease of deployment make Wi-Power especially suitable for hard to reach, rural consumers that are typically underserved by broadband services. Our goal is to bring reliable, affordable Internet and phone services to all consumers who want them, regardless of their location", says Ami Rodriguez, Director of Marketing & Business Development for TWN.

TWN plans to deploy service throughout Navopache Electric's service territory during the coming year. Updates will be provided by TWN and NEC as new areas are served. "The availability of

Internet service has been shown to correlate with higher income levels, and Navopache's Mission Statement includes "strengthening the economy throughout our service area", so this partnership fits our mission", said David Plumb, Navopache's Chief Executive Officer.

About TransWorld Network, Corp.:

TWN currently partners with close to 100 electric cooperatives throughout the country to provide co-branded communications programs for their members. Product offerings include High-Speed Internet and Digital Phone services, traditional long distance and toll-free services as well as related ISP support and content services. For more information about Wi-Power Internet & Digital Phone Service, please call TWN at 1-877-892-2010 or visit www.wi-power.com.

About Navopache Electric Cooperative:

Navopache Electric Cooperative, Inc., (NEC), is a rural electric transmission and distribution cooperative formed in 1946 and headquartered in Lakeside, Arizona. NEC provides service to over 40,000 members in its 10,000 square mile service territory covering parts of Navajo, Apache, Gila and Greenlee counties in east-central Arizona, and Catron County, New Mexico.
