TWN OFFERS WI-POWER DIGITAL PHONE SERVICE TO CONSUMERS IN ARIZONA AND NEW MEXICO

ARIZONA/NEW MEXICO – MAY 4TH, 2009 – TransWorld Network, Corp. (TWN) in partnership with Southeastern Arizona and Southwestern New Mexico Electric Cooperatives now offers Digital Phone service as part of their broadband product offering.

Wi-Power Digital Phone service, commonly known as VoIP, (Voice over Internet Protocol) uses a high-speed Internet connection to make and receive telephone calls instead of traditional copper phone lines. This technology eliminates the need for consumers to keep a traditional landline telephone. “Many of our rural consumers have limited access to cellular phone service. Land line services are expensive and frequently suffer quality related issues. This product offers significant savings to our subscribers” says Colin Wood, CEO of TWN.

Customers who bundle phone service with their Wi-Power High-Speed Internet will be able to make unlimited local and long distance calls in the lower 48 states,

Canada and Puerto Rico for as low as \$19.95 per month. Over 6,000 consumers in Arizona and New Mexico use Wi-Power for their Internet connection and now have the option to add local and long distance phone service. Jack Blair, Chief Member Services Officer for Sulphur Springs Valley Electric Cooperative says, "I was part of the trial period for this product; my experience and the feedback I got from other co-op members was great. The service is reliable and offers the same features as my traditional phone like 911, Caller ID and Call Forwarding. Best of all, Wi-Power Digital Phone costs less than typical phone service - we are pleased to bring our members additional value through this new offering."

About TransWorld Network, Corp.

TWN currently partners with over 115 rural electric cooperatives throughout the country to provide cooperative branded communications programs for their members. Product offerings include: Internet access, digital phone service and several forms of long distance services - all branded on behalf of its' rural electric cooperative partners.
