

Wi-Power® Business Communication Solutions

Wi-Power Internet & Phone Service provides communication solutions, including Internet and voice services for businesses of all sizes from small / mid-size companies to large corporations.

Flexible, Scalable Solutions

Wi-Power does not rely on last mile infrastructure from high priced telecommunication companies. Instead, TransWorld Network, Corp. (TWN) owns every mile of the Wi-Power network allowing for unmatched performance and reliability at extremely competitive pricing. With a scalable network, you get lower initial capital and operating costs, faster, more cost-effective implementation and seamless integration. The Wi-Power network encompasses both wired and wireless architecture, using industry leading, high performance equipment to address even the most demanding redundancy and diversity requirements.

- **Internet Access Solutions** – customizable speeds to meet your business needs.
- **Connectivity** – Easy to manage Ethernet hand-off.
- **Customize Your Bandwidth** – Not restricted to traditional increments and can support symmetrical upload/download access.
- **Real Time Services** – Includes voice, video, multimedia, and all other required IP data transit.
- **Cutting-Edge Architecture** – Far superior to alternative provider solutions.
- **Multi-layer Security Platform** – Same solutions trusted by utility, government and military sectors.

Cost-Effective, Quick Setup

Wi-Power's Internet services bypass the local phone and cable companies' infrastructure.

- **Fast installations** – Not dependent on other carriers for service, which allows service to be installed at a fraction of the time and cost.
- **Easy Upgrades** – Need more bandwidth? It's simple to increase and customize to your business needs.

Reliable and Dedicated

We are dedicated to providing exceptional service for you and your business.

- **24x7** – Experienced, knowledgeable and dedicated staff supports your network around the clock.
- **Network monitoring and enterprise-level support** – We monitor and control network elements, bandwidth allocation, re-route traffic and troubleshoot network issues.
- **Service Level Agreement** – Performance guarantees provide peace of mind to our customers.
